Game Based Learning

by

Mr. J. Antoni Santha Seelan,
Assistant Professor in Education,
Meston College of Education.

20/07/2022

3:00 pm

**Media Centre
Meston College of Education**

Objectives of Presentation

Teacher Educators will be able to :

- enhance critical thinking and engaging in collaborative discourse and providing opportunities for guided reflections.
- increase engagement and motivation to learn when the game based learning is incorporated.
- introduce situational learning which understands new concepts in the context of their social relationship.
- help problem solving by fostering skills like causation, logic and decision making.
- address special education needs by creating positive environment and generate academic success.
